WEBSITE

OUR CONCEPT

A true epigenetic house

Today, we can work with time, slow down its effects and learn to age better. The science of longevity has profoundly changed our outlook: the way our skin ages depends largely on our lifestyle, our diet, our inner balance and the care we give it.

The aim is not to transform, but to preserve, regenerate and enhance: caring for our youth and health capital to rediscover, at every stage of life, the best version of ourselves.

The strength of Centre Derm'es lies in the synergy of several areas of expertise: advanced technologies, patented professional treatments and medical procedures.

Complimentary first consultation

Initial assessment and a tailored protocol: precise diagnosis with the skin analyser, followed by a trial of the most suitable technology.

A HOLISTIC APPROACH

PHYSIONUTRITION & MICRONUTRITION

Registered Metagenics prescriber. Personalised supplement and dietary advice.

Included in body contouring packages

BLOOD TESTS & MICROBIOME

Personalised support from OSYVA Préventuelle for blood tests and microbiome analysis.
